CANCER SCIENCE 2025

A detailed scanning electron micrograph (SEM) of several cancer cells. The cells are spherical and covered in a dense network of fine, hair-like filaments called microvilli. The image is colorized, with different cells and parts of the same cell showing various colors like purple, blue, green, and yellow against a dark background.

“The aim of Cancer Research is to understand the processes and dynamics of cancer biology, to better comprehend the mechanisms of tumor development, progression, and the interactions between cancer and the human body”
